

Integrated Security that does it ALL!

Hospitals and healthcare systems face an ever-increasing challenge to improve patient security, staff safety, and to secure valuable equipment.

Nurses and nursing executives face daily security risks that are unique to their particular department and are looking for easy-to-use and cost-effective solutions.

Biomedical engineering and facilities staff also want to eliminate the loss of valuable equipment.

Security directors and senior administrators are faced with the prospect of procuring several technology systems and adding the burden of the associated budgets to maintain multiple systems.

AllGuard is unparalleled as an Active RFID platform delivering an integrated security solution for hospitals, psychiatric facilities, and other healthcare centers for all of the following security needs:

- **TotGuard Infant Security**
- **Wandering Patient Protection**
- **Pediatric Protection**
- **SafeGuard Staff Duress**
- **Asset Tracking & Loss Prevention**

Whether you are a Healthcare Security Officer or Security Director, supervising Women's Services, managing Pediatrics, heading your Psychiatric unit, AllGuard Integrated Security for Healthcare offers best-in-class security for every specialized unit and a single, common platform that is easy to implement, easy to expand, and that will help ease pressure on your hospital's budget.
