

The Hospital of the Future...Today

SMART RFID is part of **ADA Security Systems**, established in 1991 and one of Ireland's leading security companies. RFID is a wireless technology that allows rapid tracking, counting and managing of People, Assets, Stock, Vehicles etc.

Every year there are literally millions of Euro lost throughout the healthcare system because of wastage from expired medication, unnecessary inventory levels and increased labour and workload trying to locate and manage assets and inventory - usually from front-line staff that are desperately needed elsewhere.

SMART RFID offers a comprehensive cost-effective solution.

Track & Manage Assets, Patients & Inventory All on One Platform

SMART RFID

Tag it, Find it, Count it and Manage it all from a Simple Cloud-based Platform

ASSET TRACKING & MANAGEMENT

Experience Real Time Visibility and instantly know where your essential equipment is, and where it's been. Eliminate loss and theft – you can automatically lock exits if a valuable item is being taken from the building. You can even manage and track servicing and calibration.

INVENTORY CONTROL

Smart RFID can monitor your entire medical inventory (inc small high value items like stents) in real time so that you know exactly what you have, where it is, when it expires, when you need to order and it can even monitor the temperature in your fridges.

STAFF SAFETY & PATIENT MONITORING

INFANT SECURITY

Our tags are small, light and comfortable with the best infection control design in the industry. Only tag available with Dual-Tamper alert making it impossible to remove them without setting off an alarm event but also eliminates nuisance alarms.

PATIENT FLOW

Our Patient Flow Management system offers cutting edge technology to streamline and improve ER performance by providing real-time visibility of patients, staff and equipment, and the interaction between them.

PATIENT WANDER

Our tags are the smallest and lightest in the industry with a strong yet comfortable tamper proof strap. Real time patient location (inc photograph). Simple and fast 2 step enrollment and discharge with patient photograph.

STAFF SAFETY AND DURESS ALARM

Precise location allowing for rapid response where every second can be vital. Smart RFID offer a solution for every situation from simple assistance alarms to high risk psychiatric applications and man down systems.
